

PIONEER CAMP NOW SCENE OF MUCH ACTIVITY

"Every train that arrives at Springdale from the south is loaded with passengers bound for the camp of Pioneer," stated Dave Holland last evening. Mr. Holland has spent several days in the new camp and is very enthusiastic over the future of that district and states that the population is increasing rapidly. Goldfield is also fairly well represented, as is the northern end of the county.

"There is no question," continued Mr. Holland, "as to the future of the camp. Lots on Main street that were selling for \$50 a week ago are now selling for \$500 and \$1000. The district was started about the first of the year, and the first house was built at that time. Now there are fully 500 people in the camp and nearly fifty houses are either built or under course of construction. The town will have a bank very shortly and the erection of a hotel has been started. The building of a pipe line will also be started very soon and the survey for a railroad from Springdale is now under way. This road will be a branch of the Tonopah and Tidewater and the officials have spent several days in the camp looking over the situation. The main mine is stripping about ten tons of ore daily and the leasers predict that the output inside of the next month will be between \$5000 and \$10,000 a day. The leasers expect to encounter the pay shoot inside of the next ten days. Already about twenty-five leases have been let and of this number ten of them are working and the rest of them will start by the first of February. The Mayflower mill has been completed and will start operations inside of the next ten days."

Mr. Holland will return to Pioneer today and spend several days there as he has acquired a few interests there.

Concerning the Schubert's, which appear here tomorrow night at the Pavilion theater, Grafton (W. Va.) Lodge No. 31, I. O. O. F., says: "Every number presented was a gem and the performers were applauded to the echo. The entire entertainment appealed to the good taste, of the large and appreciative audience and was a success in every particular."

The seats have been placed on sale at the Union drug store and the price of admission will be \$1.

Lots of fun and reasting at the hard times social. Don't cost you a cent unless you wear your good clothes. Presbyterian church, January 29.

THOROUGHbred BOOM IS ON AT BELLEHELEN

A. D. Cranstoun, foreman of the Nevada-Bellehelen property at Bellehelen, came in from that district yesterday and leaves this morning for Denver, where he will spend several weeks visiting friends. Mr. Cranstoun states that a new strike was made several days ago by leasers working on the Lawrence property at Horseshoe, who discovered tellurium ore. When the report of this discovery reached Helena it caused quite a stampede to the scene and a number of offers were made for leases. The rock found carries high values and the discoverers are preparing to carry on extensive operations.

On the Nevada-Bellehelen property work is being rushed along and a force of fifteen men is now employed. The company will soon start to build a pipe line from the springs, about two miles away, and in the spring will probably start on their mill. Several shipments of lumber have been received at the mine which will be used in erecting a number of company buildings, the erection of which will be started soon. The company is working in a 150-foot shaft, a forty-foot shaft and in an open cut, and the ore extracted is placed on the dump awaiting the erection of the mill.

DEPTH PROVES THAT VALUES ARE IN PLACE

Development in the Keane Wonder are very encouraging this week, though nothing of a sensational nature has been uncovered, yet the steady and consistent advancement made in the showing of mineral wealth justifies the official statement that the property never looked so good.

In the lower tunnel, where work is going on at several points, the latest thing is a substantial proof of certain ideas of Superintendent Wilson. The ore bodies have been found in every instance to have been less broken up and to stand in a more nearly vertical position. The big deposit which was considered the main lead in the upper tunnel, has now been developed below stronger and of better grade than above. A shaft, or rather a winze, has been started to reach the values that depth has shown.

The cyanide department now being added to the mill is being crowded as fast as possible. All of the men available are being put to work. The plant will be ready for operation within three weeks.

The grade of ore being milled is now averaged at \$10 per ton. This comes mostly from the lower levels. —Bullfrog Miner.

WOULD PROTECT INVENTORS.

PITTSBURG, Jan. 26.—At the request of Representative William Sulzer of New York, the chamber of commerce committee on legislation will prepare a bill to protect all American inventors. While foreign inventors are protected in the United States for seventeen years without taxes or depreciation in value by compulsory working, Great Britain, France and Germany have laws necessitating great expense upon American inventors. In a letter to the Pittsburg chamber of commerce, Representative Sulzer says: "I take a deep interest in this matter, and if you will be good enough to prepare a bill that will cover the subject matter, to protect the American inventor and give them the same rights as foreign countries are giving to their inventors, I will introduce the bill and do everything in my power to pass it."

CANADA TO HELP PAY NAVY.

OTTAWA, Jan. 26.—The first session of the eleventh parliament of Canada was opened today. It was announced that George Foster, minister of finance, will move in the house at an early day the following resolution which points to Canada now contributing a share to the maintenance of the British navy: "In view of her great varied resources, of her geographical position and national environment, and of that spirit of self help and self respect which alone benefits a strong and growing people, Canada should no longer delay in assuming her proper share to the suitable protection of her exposed coast line and great sea ports."

FORECLOSES ON CAR COMPANY

CITY OF MEXICO, Jan. 26.—The United States and Mexican Trust company of this city has foreclosed its mortgage of \$300,000 against the Mexican Car and Foundry company's plant situated here and bid in the property on behalf of the committee of American bondholders of which Murray W. Ferris of New York is chairman. The buildings of the company cover seventeen acres. They are well equipped for manufacturing railroad cars. It is reported that the plant may be sold to the National Railways of Mexico.

CAPITALIST MISSING.

SAN FRANCISCO, Jan. 26.—John D. Feldman, an aged capitalist and wholesale liquor dealer of this city, who started for home yesterday afternoon for a walk, has not been seen since he was noticed coming out of the museum in Golden Gate park late in the day. He was known to have had a large sum of money on his person, and it is feared that he has met with foul play. A search for him is being made by the police.

FAIRVIEW MAN ASKS JUDGMENT FOR LARGE SUM

RENO, Jan. 26.—A suit was filed today by F. A. Virtue, a mining man of Fairview, against the Nat C. Goodwin Brokerage company, asking judgment against that company in the sum of \$7280, alleged to be due him as damages sustained for the failure of the company to perform several contracts with reference to the delivery of 6000 shares of Rawhide Coalition stock to himself and other parties, and the damages sustained by others for the alleged failure to perform the contract having been assigned to Virtue.

Virtue alleges that during the month of September the Nat C. Goodwin company as parties of the second part signed a certain agreement with himself, Alex Fawcett, W. H. Gelstorppe, W. W. Edwards, James Dunphy and the Fairview Reliance Mining company as parties of the first part, wherein they were to deliver 2000 shares of stock in the Rawhide Coalition Mining company as soon as the indebtedness existing on that should incur between Dunphy, Edwards and the Fairview Reliance Mining company and the Nat C. Goodwin company should be satisfied. Similar agreements it is alleged were made by the terms of which the brokerage company was to deliver 2000 shares of stock to Alex Fawcett, 1000 shares each of the Rawhide Coalition to Dunphy and Edwards. The complaint alleges that the indebtedness was satisfied shortly after the contract was signed, but that the brokerage company refused to deliver the stock according to the agreement. The complaint further alleges that the brokerage company was possessed of the stock and could have delivered it, but that it used the stock to its own benefit. The stock was all to be deposited in trust until January 1 of this year.

The plaintiff alleges that he had several opportunities to dispose of the stock promised to him at a profit and that the other parties had similar opportunities, but that they were unable to do so by reason of the failure of the brokerage company to carry out its contracts.

Virtue asks judgment for \$2940 for each block of 2000 shares and \$700 for each block of 1000 shares. He is represented by Summerfield and Currier.

NOT PLANNING PACIFIC LINE.

HAMBURG, Jan. 21.—The Hamburg-American Steamship company today denied the report that it purposed to establish a line of steamships between Australia and Portland, Oregon.

Freak Laws Looked For

(Continued from Page 1.)

see that the residents of the mining camps especially are at least given an opportunity of knowing what is served to them as food.

Freak laws are looked for. Among others being prepared is one for the establishment of a public bath house at every county seat and imposing a penalty on persons who fail to bathe at least once in two weeks.

Another provides an appropriation to be used in discovering a method of transforming sagebrush into a food product and employing Luther Burbank to direct the investigations. Lunsford of Washoe, it is understood has a bill in his care tending to establishing a state eating house at Carson. This of course will be strongly opposed by the hotel interests of Carson City in the event that Lunsford is not prevailed upon to change his present opinion. Hunger, wielded by powerful influences can overcome many obstacles.

Among the bills which were introduced in the assembly today was a measure by Curtin of Esmeralda to amend the election laws. This is intended to take the power of directing court house appointments from the hands of the board of commissioners.

Assemblyman Gallagher of Rawhide presented a bill providing for the appointment of a justice of the peace and constable at Rawhide.

Assemblyman Brandon, of Humboldt, put in a bill relating to court stenographers, specifying their duties and compensation.

Senate bill No. 4, appropriating \$5000 for a fish hatchery at Verdi was passed by the assembly.

In the senate, Boyd's bill providing for a salary of \$3000 a year for the district attorney of Washoe county and \$2400 per year for his deputy was passed. It now goes to the assembly, where it is believed it will meet with some delay. Ormsby's district attorney will get \$2500 per year if a similar bill passed in the house today, is carried through the senate.

MAY CREATE STEAMSHIP LINES.

VICTORIA (B. C.), Jan. 26.—The Chinese government has instructed its ministers at Washington, London, Paris and Tokio to make inquiries into the system and management of the steamship business of the four countries, with the view to the establishment of a national steamship line. It will be financed by the government and aided by subsidies similar to the Japanese state-aided steamship lines. It is proposed to establish service first on Chinese rivers and then on the Chinese coast, followed by a transpacific line.

The Bonanza has a complete bindery in operation.
